### Smart Overview

**SyscomERP *smart*** is built on our unique understanding of the key challenges facing the apparel industry. Developed specifically for companies operating in corporate, safety, promotional, PPE and school wear sectors, **SyscomERP *smart*** is intuitive, easy-to-use and suitable for almost any size of organisation from five users upwards, so it is ideal for both individual and group operations.

**SyscomERP *smart*** offers you the crucial technology, industry specific functionality and tools you need to deliver:

- **Greater operational efficiency.**
- **Improved customer service.**
- **Tighter cost control across your business.**

### Smart Core Functionality

The core functionality is all you need to get up and running with finance, sales order processing, purchase order processing and inventory—a fully integrated, modern software application that can help you manage all of these areas within your business.

As your business grows and develops you can simply add from the option list to enhance your existing core functionality giving you even tighter control and visibility of all aspects of your business operations.

To ensure you get the most from the implementation process, Syscom have put together a **Smart Services** package that will get you up and running and covers everything you need to operate **SyscomERP *smart*** - a total software and services solution for your business.

## Smart Core Functionality

**SyscomERP *smart* core offers a complete financials, analytics and distribution system that unifies data and processes across the business, connects staff, customers and suppliers.**

### Smart Finance

**Smart Finance** provides a comprehensive range of functionality to help manage this aspect of your business including cash & bank, general ledger, sales ledger and purchase ledger. Included within **Smart Finance** is a number of standard reports allowing you to make instantaneous strategic business decisions and produce your management accounts with ease.

### Smart Procurement & Distribution

**Smart Procurement & Distribution** allows you to control your inventory, manage your supply chain effectively and collaborate with your suppliers and customers efficiently. Incorporating many features for the apparel market place, such as attribute maintenance and matrix functionality, **Smart Procurement & Distribution** delivers improved cost, supplier performance and customer service through accurate stock management.

### Smart Reporting & Business Intelligence

**Smart Reporting** offers powerful reporting and analytical tools that enable you to convert the extensive data the system holds into the valuable and meaningful information your business needs. As a standard element of the **Smart Core**, the overall reporting function helps deliver key business information when you need it in a clear and concise manner; with the ability to view key performance indicators for the business at a click of a mouse. Furthermore, **Smart e-reporting** offers the option to generate high-value, structured business information and deliver it as a seamlessly integrated component of your e-business web site if required.

### Smart Services

To complement your **Smart Software Solution**, our **Smart Services** deliver a standardised ten day implementation and training package to get you up and running in an efficient and effective manner. Our **Smart Services** package forms the basis of your implementation plan and gives you the benefit of having a simple structured approach to installing the application within your business based on agreed timescales. **Smart Services** is split into four distinct areas - configuration and business process mapping, system set-up and installation, training and report configuration - everything you need to get up and running. Syscom offers further services such as project management and data loading should you require them.
