

SyscomERP

Overview

ERP Software solutions for textile, apparel and footwear companies

SyscomERP is a modern and flexible ERP **Enterprise Resource Planning** business solution specifically designed and developed for Textile and Apparel companies. SyscomERP is particularly well suited to companies within the corporate and work wear sectors offering an integrated wardrobe management module; wearers can view images of the items they require, review garment details, and receive advice on garment care, for example

SyscomERP offers a complete financials, analytics and business management system that unifies data and processes across the business, and connects staff, customers and suppliers regardless of time or location

Designed to be intuitive and easy to use, SyscomERP consists of a variety

of integrated modules covering Product Development, Financials, Manufacturing, Procurement and Distribution. These modules can be combined together to form a complete system suitable for textile and apparel companies of all types - including manufacturers, contract suppliers to high street retailers, importers and distributors of branded ranges.

SyscomERP is a fully multi-company, multi-currency and multi-lingual system and is ideal for both individual and group operations. Designed for today's demanding business environment, the system is highly functional and by the use of flags and settings, can be tailored to work in exactly the way your business works, yet retain the advantages of a packaged solution

Fully web enabled, SyscomERP meets the user's expectations of a modern computer system and offers a variety of user interfaces, enabling you to deploy those that best fit the needs of individual departments and business processes.

SyscomERP is delivered with a wealth of reports as standard. It offers powerful reporting and analytical tools that enable you to convert the extensive data the system holds into the valuable and meaningful information your business needs.

Designed to grow as your company grows, SyscomERP is highly scaleable and suitable for organisations from 5 to 500 users. Used by some of industry's best and well known names, SyscomERP represents a proven, affordable solution requiring the minimum of maintenance and IT resource, and offers significant business advantage with a rapid ROI.
