

Syscom

Hardware & Technical Services

Microsoft
GOLD CERTIFIED
Partner

Syscom

Syscom provide powerful technical, network infrastructure and hardware solutions to small and medium sized businesses. Our business partners are leading providers in their field of expertise and as such we can provide your business with the latest, best of breed technical solutions for your organisation, backed up with our expert services and knowledge. Syscom offer a "one stop shop" for all your IT, network infrastructure and hardware needs – your path to worry free computing.

Microsoft

As a Microsoft Gold Partner we invest continually with training courses helping us to maintain our Microsoft accreditation and knowledge of the Microsoft product set. We are fully conversant with a range of Microsoft products including:

- Microsoft Windows 2008 Server
- Microsoft Small Business Server 2008
- Microsoft Windows 7
- Microsoft Exchange Server 2007
- Microsoft SQL Server 2005 & 2008

Small Business Server

Windows Small Business Server 2008 delivers a powerful advantage to small business owners. It provides a complete network solution which brings the power of big business technology to small companies. By simplifying your business operations and allowing you to make the most of your resources, Windows Small Business Server 2008 helps your company work smarter.

Syscom

Hardware & Technical Services

HP

Syscom have been an HP business partner for several years. We can supply, configure and integrate a full range of products from HP including laptops, desktops and Intel based ML and DL class servers.

With HP hardware and Microsoft software, Syscom can provide you with an excellent IT solution for your company.

TrendMicro

As an awarding winning TrendMicro business partner we can provide your business with a total protection system including anti spyware, Officescan anti-virus, ScanMail, ServerProtect and NeatSuit. TrendMicro are the market leader in this field.

- **AntiVirus Security**
Detects and removes viruses and the latest threats from your emails, Internet downloads, removable media and PCs. Automatic updates immunize your security system against the newest virus outbreaks.
- **Spyware Protection**
Blocks and removes spyware, adware, grayware, and root kits, a new type of deep-hiding invader.
- **Personal Firewall**
Intercepts hackers and network viruses trying to attack your computer and home network.
- **Fraud Defense**
Protects you from online phishing scams designed to steal credit card and bank account numbers. Configures easily and notifies you of the latest Web-site risk.
- **Wireless Network Monitoring**
Safeguards against unauthorized users invading your wireless home network.
- **Home Network Control**
Manages, configures and updates security for every PC on your network, with an easy-to-use management console.
